

9.2 Vertical version of the Logo with other graphic symbols

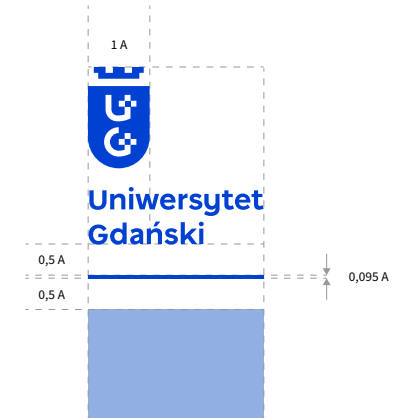

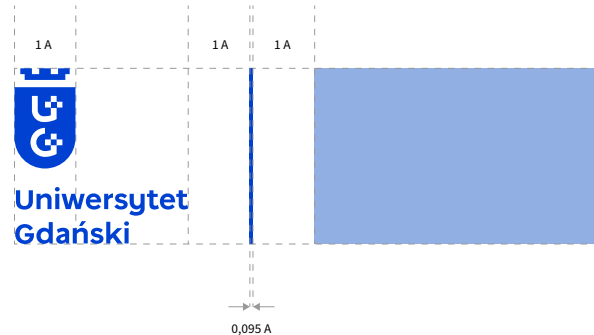

Logos of other entities may be combined with the Logo using an adequate distance based on the 'A' module which is the width of the Signet and a separator in the form of a vertical bar with the width (horizontal layout) or height (vertical layout) of 0.05 A.

Horizontal layout:

The spacing between the envelopes of both signs and the separator should be equal to 1 A. The height of the accompanying logo should not be greater than the height of the UG Logo.

Vertical layout:

The spacing between the envelopes of both signs and the separator should be 0.5 A. The width of the accompanying sign should not be greater than the width of the UG Logo.

IMPORTANT!

THE LOGO OF UG SHOULD ALWAYS APPEAR FIRST IN THE SIGN READING DIRECTION.
